

Men & Climate

- 10 From myths to science
- 11 Learning from the Nile
- 14 Observatory and work of art
- 18 The radiation budget
- 19 The greenhouse effect
- 20 Geodesy: triangulation and satellites
- 22 Discovering the sea floor

Satellites, Instruments & Models

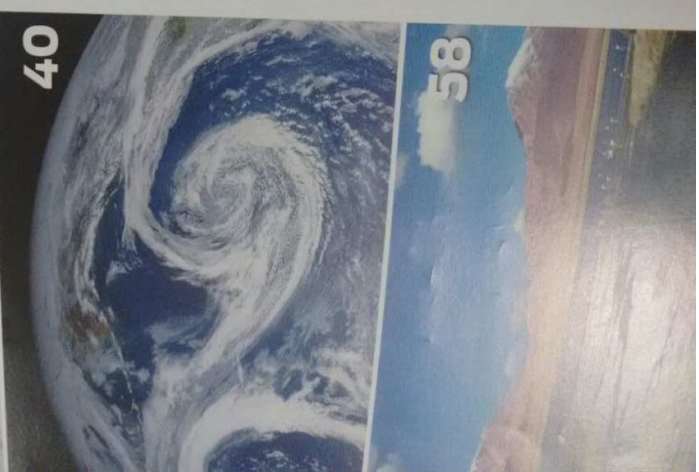

- 26 Space missions unveiled
- 30 Radiations and microwaves
- 31 A microscopic world
- 32 From weather forecasts to climate
- 34 Observations and models
- 34 High resolution modeling
- 37 Climate missions to come
- 38 Space teams

Atmosphere

- 42 The core of climate change
- 46 GPM Constellation
- 50 Climate reanalysis
- 52 IASI contribution
- 54 Tropical precipitation
- 55 Carbon measurements
- 57 Opening the Heavens

Biosphere

- 60 A remarkable ecosystem
- 64 Biomass measured
- 66 Biological opulence of Lenggu
- 70 Space Sentinels
- 72 The runaway train of Climate Change
- 75 Protecting the Maasai Mara ecosystem

Hydrosphere	78 Ocean and inland waters	78
